

AGOSTINA DI NAPOLI

Backend Developer | .NET | C# | SQL Server | ASP.NET Core | React

agosdn.dev22@gmail.com | linkedin.com/in/agostina-di-napoli | github.com/antemortem22 | Buenos Aires, Argentina

PROFESSIONAL SUMMARY

Backend Developer specialized in building REST APIs using .NET 6/8, C#, and ASP.NET Core. Skilled in backend service design, business logic implementation, and data access with Entity Framework Core (ORM) and SQL Server. Experienced in working with CI/CD pipelines in Azure DevOps, API documentation with Swagger, and endpoint testing using Postman. Collaborated on frontend-backend integrations with React and contributed to end-to-end solutions focused on code quality, performance, and maintainability. Strong problem-solving mindset with a focus on continuous improvement in Agile (Scrum) environments.

TECHNICAL SKILLS

- Backend**
C#, .NET 6/8, ASP.NET Core, REST APIs, RESTful services, Entity Framework Core (ORM), SQL Server, SignalR
- Architecture**
Layered Architecture, Repository Pattern, API Design, Transactional Validations
- DevOps & Quality**
Azure DevOps, CI/CD, Git, SonarQube, Swagger, Postman
- Frontend**
React (integration with backend)
- Other**
JavaScript, HTML, CSS
- Languages:**
Spanish (native), English(B2)

PROFESSIONAL EXPERIENCE

Backend Developer (.NET / ASP.NET Core)

CDA Informática | November 2023 – August 2025

- Developed and maintained REST APIs using .NET 6/8 and ASP.NET Core, implementing complex business logic and validations.
- Designed and implemented robust CRUD operations ensuring data integrity and proper error handling.
- Used Entity Framework Core (ORM) for efficient data access and manipulation in SQL Server.
- Documented APIs using Swagger and validated endpoints with Postman.
- Managed source control and deployments using Git and Azure DevOps, contributing to CI/CD pipelines.
- Collaborated on frontend-backend integrations using React, ensuring consistency in API contracts and data flow.
- Resolved technical issues and performed maintenance in Agile (Scrum) environments.

ACHIEVEMENTS

- Automated critical processes by implementing bulk workflows with validations and error handling, reducing operational time by 30% and data inconsistencies by 25%.
- Developed end-to-end solutions integrating validation, persistence, and real-time notifications, ensuring full process traceability.
- Implemented CI/CD pipelines using Azure DevOps and static code analysis with SonarQube, reducing production errors by 15%.
- Contributed to more than 5 backend and frontend projects using .NET and React.

EDUCATION

- Programming Technician (Incomplete)**
UNAHUR | 2023 - 2024
- Sound Engineering (Incomplete)**
UNTREF | 2020 - 2022
- High School Diploma in Social Sciences**
Colegio Inmaculado Corazón de María | 2013 - 2019

COURSES

- Python I y II – CFL 408
- JavaScript, HTML y CSS – CFL 408
- Ruby – Argentina Programa
- QA Manual – Taller UNAHUR
- C#, .NET, APIs REST y SQL Server – CDA
