

AGOSTINA DI NAPOLI

Full Stack Developer (.NET + React) | Backend-Focused | C# | TypeScript | SQL Server

agosdn.dev22@gmail.com | linkedin.com/in/agostina-di-napoli | github.com/antemortem22 | agosdev-portfolio.vercel.app | Buenos Aires, Argentina

Summary

.NET Developer focused on backend development, with experience in production environments and the ability to turn business needs into maintainable solutions through APIs, integrations, and automation.

Professional background working with C#, .NET 6/8, ASP.NET Core, Entity Framework Core, and SQL Server, contributing to integrations, incident resolution, and continuous application improvement. Focused on building maintainable solutions, applying best practices, and solving technical problems with a direct operational impact.

Core technologies: C#, .NET 6/8, ASP.NET Core, Entity Framework Core, SQL Server, REST APIs, React, TypeScript, SignalR, Azure DevOps, and Git.

Additional knowledge: Next.js, JavaScript, Tailwind CSS, Shadcn/UI, Swagger, Postman, and responsive interface development.

Experience

Full Stack Developer (.NET / React)

CDA Informática | November 2023 – August 2025

- Developed and maintained web applications using .NET 6/8, ASP.NET Core, SQL Server, and React.
- Designed and implemented REST APIs, business logic, validations, CRUD operations, and error-handling mechanisms.
- Managed data access and persistence using Entity Framework Core and SQL Server.
- Integrated frontend and backend applications through APIs, DTOs, and shared data models.
- Developed and maintained frontend features using React, contributing to user interfaces and application workflows.
- Implemented asynchronous processes, reporting features, and real-time notifications using SignalR.
- Documented and tested API endpoints using Swagger and Postman.
- Managed source code, continuous integration, and deployments through Git, Azure DevOps, and CI/CD pipelines.
- Resolved technical incidents and contributed to ongoing application maintenance within Agile Scrum teams.

Key Achievements

- Automated bulk onboarding processes with validations and error handling, reducing operational processing time by 30% and data inconsistencies by 25%.
- Developed end-to-end features integrating user interfaces, business rules, persistence, traceability, and real-time notifications.
- Improved Azure DevOps pipelines and implemented static code analysis with SonarQube, reducing production defects by 15%.

Independent Technical Development

Full Stack Developer | Personal Projects and Continuous Learning

- Ongoing technical training through certified semester-long courses, official documentation, and specialized resources focused on full stack development, the .NET ecosystem, and modern frontend technologies.
- Developed web applications and personal projects using .NET, ASP.NET Core, React, Next.js, TypeScript, and SQL Server.
- Built and integrated REST APIs with responsive web interfaces, implementing validation, state management, and API consumption.
- Designed data models, DTOs, services, and communication flows between frontend applications, backend services, and databases.
- Researched and applied software development best practices, SOLID principles, design patterns, reusable components, and application organization.
- Developed responsive user interfaces using React, TypeScript, Tailwind CSS, and Shadcn/UI, prioritizing maintainability and user experience.
- Strengthened technical skills through coding exercises, problem-solving, and the implementation of features based on real-world scenarios.
- Maintained continuous learning across the .NET and JavaScript ecosystems.

Technical Skills

- Backend**
C#, .NET 6/8, ASP.NET Core, REST APIs, RESTful services, Entity Framework Core (ORM), SQL Server, SignalR
- Architecture**
Layered Architecture, Repository Pattern, API Design, Transactional Validations
- DevOps & Quality**
Azure DevOps, CI/CD, Git, Github, SonarQube, Swagger, Postman, Manual Testing
- Frontend**
React, JavaScript, HTML, CSS, TypeScript, Tailwind.css, Motion, Next.js
- Languages**
Spanish (native), English (B2)

Education

- Higher Technical Degree in Software Development — Remote Program
IFTS No. 29 | August 2026 – December 2028 (expected graduation)

Certifications

- JavaScript, HTML y CSS – **CFL 408**
- Ruby (oop) – **Argentina Programa**
- QA Manual – **Taller UNAHUR**
- C#, .NET, APIs REST y SQL Server – **CDA**
